

KEYSIGHT TECHNOLOGIES (AGILENT HP)

6010 Series - 1200W

The Keysight (formerly Agilent / HP) 6010 Series comprises a family of 1200W, single-output DC power supplies designed for applications where built-in computer interfaces are not required. Featuring autoranging outputs, they deliver maximum power across a wide variety of voltage and current combinations, effectively allowing one supply to cover the range of multiple traditional power supplies. Models in this series feature ten-turn potentiometers for precise local control, robust overvoltage protection, and support for auto-parallel and auto-series configurations.

SPECIFICATIONS

General

Interfaces	None (No built-in computer interface)
Included Models	6010A, 6011A, 6012B, 6015A

DC Output Ratings

Maximum Output Power	1000 W
Output Channels	1
Output Type	Autoranging

Protection Features

Overvoltage Protection (OVP)	Standard
------------------------------	----------

Interfaces and Control

Front Panel Control	Ten-turn potentiometers
Multiple Unit Configuration	Auto-Parallel / Auto-Series

TECHNOLOGY

DC Power Supply

APPLICATIONS

System Power / General Purpose Test
